Foreword

The Czechoslovak Academy of Sciences held the Second Symposium on General Topology and its Relations to Modern Analysis and Algebra from August 30 to September 4, 1966, in Prague. This book contains most of the papers read at the Symposium and a few presented in written form only. The papers are in the form submitted by the authors, i.e. either as abstracts or in a more detailed version.

The Organizing Committee of the Symposium and the Editorial Committee of the Proceedings hope that this publication will be found useful by all specialists in the field of Topology and by all mathematicians interested in the present state of General Topology. At the same time they wish to express their thanks to all authors who forwarded their papers.

Editorial Committee
