CORRECTION TO THE PAPER
A GENERALIZATION OF K -COMPACT SPACES¹⁾

SHRI R. N. BHAUMIK and D. N. MISRA, Sagar

(Received June 15, 1973)

Theorem 4.1.2 on page 628 should read: *Intersection of almost K -compact subspaces of a regular space is itself K -compact.*

Let us note that without the assumption of regularity the theorem is not valid. This follows from the paper of H. HERRLICH: *On the concept of reflections in general topology*, Contributions to Extension Theory of Topological Structures (Proc. Sympos., Berlin 1967). Deutsch. Verlag Wissensch., Berlin 1969, 105–114.
