*Preliminary announcement and call for papers*

**IFSA'97 Prague — Seventh IFSA World Congress  
June 25 – 29, 1997, Prague, Czech Republic**

International Fuzzy Systems Association (IFSA) is pleased to announce that the next IFSA World Congress will take place in Prague in the Czech Republic on June 25 – 29, 1997. This is the first time this congress, which is regularly held every two years in either of America, Asia or Europe, will take place in a former East European country. We have chosen one of the most beautiful cities in the world whose magical atmosphere has been shaped over ten centuries by the happy and tolerant coexistence of the buildings, sculptures, and monuments. Prague has a population of roughly 1.3 million. Czech people are known for their hospitality and high tolerance.

The Congress topics include, but are not limited to Fuzzy and non-standard logics and approximate reasoning, Mathematical foundations, Uncertainty and belief measures, Information and data analysis, Natural language processing, Applications in social and economical sciences, Industrial applications, New hardware developments, Decision-making and control, Artificial intelligence and robotics, Neural networks and learning, Genetic algorithms and computational optimization, Chaos and its engineering, Classification and image processing.

*All the information concerning the Congress and its program can be obtained from:*
