ERRATA

E. Jucovič, *Corrections of my paper „On a problem in map colouring“*, Mat. časop. 19 (1969), 225—227.

- (1) In the 12th line on p. 225 there should be ≥ 3 instead of ≤ 3 .
- (2) The map P in Theorem 3 on p. 226 is supposed to be on the surface of the sphere.
- (3) H. Izbički lectured on simultaneous colouring of elements of a map also at the colloquium on graph theory in Manebach 1967. See his paper *Verallgemeinerte Farbenzahlen in Beiträge zur Graphentheorie*, Leipzig 1968, pp. 81—83.
- (3) Recently much work was done with simultaneous colouring of edges and vertices of graphs (total colouring). For detailed references see M. Behzad, *The Total Chromatic Number of a Graph: A Survey*, Proceedings of the 1969 Conference on Combinatorial Mathematics Held in Oxford, England, Academic Press 1970.
