## Preface

This volume (INVITED LECTURES) contains 21 papers made available to organizers by invited speakers, who delivered either plenary or section lectures. What appears here are authors' versions of papers, which will be published after a regular reviewing process in the hard copy form as one of the volumes of *Mathematica Bohemica* (ISSN 0862-7959) during 2002. The editors transferred these contributions into the hypertext format, making an easy orientation and browsing possible.

We thank to Mrs. Eva Ritterova from the Mathematical Institute, Academy of Sciences of the Czech Republic, Prague, for help with formatting the files.
