Preface

This volume (PAPERS) is a part of the EQUADIFF 10 CD ROM and it was prepared in hypertext PDF format using $\text{\LaTeX} 2_{\epsilon}$. A limited number of copies is published also in the usual hard copy form. It contains 45 papers, accepted for presentation on the EQUADIFF 10 Conference in the form of communications, posters or extended abstracts and submitted for publication by the authors. A part of the articles is in the final form and will not be published elsewhere, major part are preliminary versions. The expression “overview article” is used here in a rather broad sense and represents mostly the presentation of results already published or submitted for publication in one or more papers of the authors or a usual survey paper. This is mentioned in footnotes on the first pages of papers on the base of the author’s opinion.

The papers published in this volume (PAPERS) have not gone through a detailed referee process. The acceptance for the presentation at the Conference and a good response from the participants were considered as a proper evaluation, corresponding to this type of publication.

We thank to Mrs. Milada Suchomelova from the Masaryk University, Brno, for the administrative work and e-mail correspondence connected with the preparation of this volume.
