# Colophon

The DML 2009 proceedings were produced from the authors' electronic manuscripts. Following the guidelines, the authors prepared their papers using  $\LaTeX$  markup.

Contributions were edited into the uniform markup of Springer llncs style and custom-written  $\TeX$  macros, and were processed by the proceedings editor in Brno.

Michal Růžička helped with entering hundreds of spelling and typographical corrections into the text corpora of the  $\LaTeX$  files.

The proceedings was typeset in Palatino by Hermann Zapf and in AMS Euler fonts named after pioneering mathematician Leonhard Euler. The book was typeset using the Pdf $\TeX$  typesetting system primarily developed by Hàn Thế Thành during his studies in Brno (1990–2001). Microtypographical extensions that Pdf $\TeX$  implements were used, and book was composed with the  $\LaTeX$  macro package in a single  $\TeX$  run. Generating the hypertext version of the proceedings in PDF was done from the same source files.

The main editing, typesetting and proofreading steps were undertaken at the Natural Language Processing Laboratory of the Faculty of Informatics, Masaryk University in Brno.

The proceeding editor thank sincerely all the authors for their contributions and everybody who was involved in the book production. Without their hard and diligent work the proceedings would not have been in such a good shape and ready on time for the DML 2009 workshop.
