Contents

Preface	7
<i>Stanislav Bartoň</i> Vectorization of bitmaps based on the LSQ method	9
<i>Marek Brandner, Jiří Egermaier, Hana Kopincová</i> High resolution schemes for open channel flow	15
<i>Jan Březina</i> Instability of mixed finite elements for Richards' equation	22
<i>Marta Čertíková, Pavel Burda, Jaroslav Novotný, Jakub Šístek</i> Some remarks on averaging in the BDDC method	28
<i>Jan Česenek, Miloslav Feistauer</i> Interaction of compressible flow with an airfoil	35
<i>Jan Chleboun</i> Elements of uncertainty modeling	42
<i>Pavol Chocholatý</i> A nonlinear system of differential equations with distributed delays	58
<i>Josef Dalík</i> Complexity of the method of averaging	65
<i>Dalibor Frydrych</i> Usage of modular scissors in the implementation of FEM	78
<i>Petr Harasim</i> On the worst scenario method: Application to uncertain nonlinear differential equations with numerical examples	84
<i>Martin Horák, Mathieu Charlebois, Milan Jirásek, Philippe K. Zysset</i> Nonlocal tangent operator for damage plasticity model	89
<i>Jiří Hozman</i> A shock-capturing discontinuous Galerkin method for the numerical solution of inviscid compressible flow	95
<i>Radka Keslerová, Karel Kozel</i> Numerical modelling of Newtonian and non-Newtonian fluids flow in the branching channel by finite volume method	101
<i>Martin Kocurek</i> Insensitivity analysis of Markov chains	107

<i>Petr Kotas, Vít Vondrák, Pavel Praks</i> Parallel SVD computation	113
<i>Martin Kramář</i> Introduction to algorithms for molecular simulations	119
<i>Václav Kučera</i> A new reconstruction-enhanced discontinuous Galerkin method for time-dependent problems	125
<i>Pavel Kůs</i> Integration in higher-order finite element method in 3D	131
<i>Ladislav Lukšan, Ctirad Matonoša, Jan Vlček</i> Robust preconditioners for the matrix free truncated Newton method	137
<i>Vratislava Mošová</i> Realization of Dirichlet conditions in RKPM	152
<i>Karel Segeth</i> A comparison of some a posteriori error estimates for fourth order problems ...	158
<i>Martina Smitková, Marek Brandner</i> Numerical modeling of neutron transport – finite volume method, residual distribution schemes	165
<i>Martin Soukenka</i> On a dynamics in rational polygonal billiards	171
<i>Petr Sváček, Jaromír Horáček</i> Numerical approximation of flow in a symmetric channel with vibrating walls .	177
<i>Ivana Šebestová, Vít Dolejší</i> A posteriori error estimates of the discontinuous Galerkin method for parabolic problem	191
<i>Jiří Vala</i> Inverse problems of heat transfer	197
<i>Tomáš Vejchodský</i> Complementarity – the way towards guaranteed error estimates	205
<i>Miloslav Vlasák, Zuzana Vlasáková</i> Derivation of BDF coefficients for equidistant time step	221
<i>Jan Vlček, Ladislav Lukšan</i> Limited-memory variable metric methods that use quantities from the preceding iteration	227

Jan Zeman, Pavel Gruber

Numerical approach to a rate-independent model of decohesion in laminated composites	233
List of Participants	233
