Contents

Preface i

List of Publications of Karel Segeth v

J. Brandts, A. Cihangir
Counting triangles that share their vertices with the unit n-cube 1

P. Burda, J. Novotný, J. Šístek
Analytical solution of rotationally symmetric Stokes flow near corners 13

R. Castelli, J.-P. Lessard
A method to rigorously enclose eigenpairs of complex interval matrices 21

V. Dolejší
hp-anisotropic mesh adaptation technique based on interpolation error estimates 32

I. Faragó
Convergence and stability constant of the theta-method 42

L. Farina, J. S. Ziebell
Solutions of hypersingular integral equations over circular domains by a spectral method 52

P. Fraňková, M. Hanuš, H. Kopincová, R. Kužel, P. Vaněk, Z. Vastl
A short philosophical note on the origin of smoothed aggregations 67

U. Garibaldi, T. Radivojević, E. Scalas
Interplay of simple stochastic games as models for the economy 77

L. Gerardo-Giorda
Numerical approximation of density dependent diffusion in age-structured population dynamics 88

A. Gil, J. Segura, N. M. Temme
On the computation of moments of the partial non-central chi-square distribution function 98

J. Haslinger, V. Janovský, R. Kučera
Path-following the static contact problem with Coulomb friction 104

J. Hrabě
Fast optical tracking of diffusion in time-dependent environment of brain extracellular space 117

L. Kárná, Š. Klapka
Detection codes in railway interlocking systems 124

S. Korotov, M. Křížek
On simplicial red refinement in three and higher dimensions 131

Y. Li, Q. Lin, H. Xie
A Parallel method for population balance equations based on the method of characteristics 140

J. Mlýnek, R. Srb
Parallel programming and optimization of heat radiation intensity 150

V. Mošová
Integral transforms – the base of recent technologies 158

G. Opfer, D. Janovská
Zero points of quadratic matrix polynomials 168

V. Podsechin, G. Schernewski
Finite element modelling of flow and temperature regime in shallow lakes 177

J. Považan, B. Riečan
Fuzzy sets and small systems 185

L. Remaki
Riemann solution for hyperbolic equations with discontinuous coefficients 188

P. Sváček, J. Horáček
On mathematical modelling of gust response using the finite element method .. 197

M. -B. Tran
On domain decomposition methods for optimal control problems 207

J. Vala
On the computational identification of temperature-variable characteristics of heat transfer 215

T. Vejchodský
A direct solver for finite element matrices requiring $O(N \log N)$ memory places 225

P. Zhu
Spherically symmetric solutions to a model for interface motion by interface diffusion 240

Z. Zlatev, I. Dimov, I. Faragó, K. Georgiev, Á. Havasi, Tz. Ostromsky
Application of Richardson Extrapolation with the Crank–Nicolson scheme for multi-dimensional advection 248
