# Table of Contents

## Front matter

Karol Mikula, Daniel Ševčovič, Jozef Urbán ..... i-viii

## Positive solutions for a system of fractional boundary value problems

Johnny Henderson, Rodica Luca ..... 1-10

## Boundedness and stabilization in a three-dimensional two-species chemotaxis-Navier-Stokes system

Tomomi Yokota, Misaki Hirata, Shunsuke Kurima, Masaaki Mizukami ..... 11-20

## On the Solution Set of a Nonconvex Nonclosed Second Order Inclusion

Aurelian Cernea ..... 21-28

## Dynamical model of viscoplasticity

Konrad Kisiel ..... 29-36

## Nonlinear diffusion equations with perturbation terms on unbounded domains

Shunsuke Kurima ..... 37-44

## On behavior of solutions to a chemotaxis system with a nonlinear sensitivity function

Kentarou Fujie, Takasi Senba ..... 45-52

## Viral infection model with diffusion and state-dependent delay: a case of logistic growth

Alexander V. Rezounenko ..... 53-60

## Boundedness in a fully parabolic chemotaxis system with signal-dependent sensitivity and logistic term

Masaaki Mizukami ..... 61-68

## Kolmogorov's epsilon-entropy of the attractor of the strongly damped wave equation in locally uniform spaces

Jakub Slavík ..... 69-78

## The Tree-Grid Method with Control-Independent Stencil

Igor Kossaczky, Matthias Ehrhardt, Michael Günther ..... 79-88

<b>Multiple positive solutions for a p-Laplace critical problem (<math>p &gt; 1</math>), via Morse theory</b>	
Giuseppina Vannella .....	89-96
<b>Propagation of errors in dynamic iterative schemes</b>	
Barbara Zubik-Kowal .....	97-106
<b>On Lyapunov stability in hypoplasticity</b>	
Victor A. Kovtunenکو, Pavel Krejčí, Erich Bauer, Lenka Siváková, Anna V. Zubkova .....	107-116
<b>Exponential convergence to the stationary measure and hyperbolicity of the minimisers for random Lagrangian</b>	
Alexandre Boritchev .....	117-126
<b>Analysis of the FEM and DGM for an elliptic problem with a nonlinear Newton boundary condition</b>	
Miloslav Feistauer, Ondřej Bartoš, Filip Roskovec, Anna-Margarete Sändig .....	127-136
<b>Numerical homogenization for indefinite H(curl)-problems</b>	
Barbara Verfürth .....	137-146
<b>Singularly perturbed set of periodic functional-differential equations arising in optimal control theory</b>	
Valery Y. Glizer .....	147-156
<b>Nonexistence of solutions of some inequalities with gradient nonlinearities and fractional Laplacian</b>	
Evgeny Galakhov, Olga Salieva .....	157-162
<b>Semi-analytical approach to initial problems for systems of nonlinear partial differential equations with constant delay</b>	
Helena Šamajová .....	163-172
<b>Visco-elastic-plastic modelling</b>	
Jana Kopfová, Mária Minárová, Jozef Sumec .....	173-180
<b>Cross-Diffusion Systems with Entropy Structure</b>	
Ansgar Jüngel .....	181-190
<b>Numerical modeling of heat exchange and unsaturated-saturated flow in porous media</b>	
Jozef Kačur, Patrik Mihala, Michal Tóth .....	191-200
<b>A well-posedness result for a mass conserved Allen-Cahn equation with nonlinear diffusion</b>	
Perla El Kettani, Danielle Hilhorst, Kai Lee .....	201-210

<b>Vectorial quasilinear diffusion equation with dynamic boundary condition</b>	
Ryota Nakayashiki .....	211-220
<b>Remarks on the qualitative behavior of the undamped Klein-Gordon equation</b>	
Jorge A. Esquivel-Avila .....	221-228
<b>Two approaches for the approximation of the nonlinear smoothing term in the image segmentation</b>	
Matúš Tibenský, Angela Handlovičová .....	229-236
<b>Stability of ALE space-time discontinuous Galerkin method</b>	
Miloslav Vlasák, Monika Balázsová, Miloslav Feistauer .....	237-246
<b>Upper Hausdorff dimension estimates for invariant sets of evolutionary systems on Hilbert manifolds</b>	
Amina Kruck, Volker Reitman .....	247-254
<b>Gaussian curvature based tangential redistribution of points on evolving surfaces</b>	
Matej Medfa, Karol Mikula .....	255-264
<b>Computational design optimization of low-energy buildings</b>	
Jiří Vala .....	265-274
<b>A generalization of the Keller-Segel system to higher dimensions from a structural viewpoint</b>	
Kentarou Fujie, Takasi Senba .....	275-282
<b>A Note on the Uniqueness and Structure of Solutions to the Dirichlet Problem for Some Elliptic Systems</b>	
Jann-Long Chern, Shoji Yotsutani, Nichiro Kawano .....	283-286
<b>Classical and generalized Jacobi polynomials orthogonal with different weight functions and differential equations satisfied by these polynomials</b>	
Mariana Marčoková, Vladimír Guldan .....	287-294
<b>Stochastic Modulation Equations on Unbounded Domains</b>	
Luigi A. Bianchi, Dirk Blömker .....	295-304
<b>An efficient linear numerical scheme for the Stefan problem, the porous medium equation and nonlinear cross-diffusion systems</b>	
Motlatsi Molati, Hideki Murakawa .....	305-314
<b>Continuous dependence for BV-entropy solutions to strongly degenerate parabolic equations with variable coefficients</b>	
Hiroshi Watanabe .....	315-324

<b>Numerical study on the blow-up rate to a quasilinear parabolic equation</b>	
Koichi Anada, Tetsuya Ishiwata, Takeo Ushijima .....	325-330
<b>Two methods for optical flow estimation</b>	
Viera Kleinová, Peter Frolkovič .....	331-340
<b>Mathematically Modelling The Dissolution Of Solid Dispersions</b>	
Martin Meere, Sean McGint, Giuseppe Pontrelli .....	341-348
<b>Toward a mathematical analysis for a model of suspension flowing down an inclined plane</b>	
Kaname Matsue, Kyoko Tomoeda .....	349-358
<b>Behaviour of the support of the solution appearing in some nonlinear diffusion equation with absorption</b>	
Kenji Tomoeda .....	359-368
<b>An elementary proof of asymptotic behavior of solutions</b>	
Motohiro Sobajima, Giorgio Metafuno .....	369-376
<b>Nonlinear Tensor Diffusion in Image Processing</b>	
Oľga Stašová, Angela Handlovičová, Karol Mikula, Nadine Peyriéras ....	377-386
<b>New efficient numerical method for 3D point cloud surface reconstruction by using level set methods</b>	
Balázs Kósa, Jana Haličková-Brehovská, Karol Mikula .....	387-396
<b>Converse problem for the two-component radial Gross-Pitaevskii system with a large coupling parameter</b>	
Jean-Baptiste Casteras, Christos Sourdis .....	397-406
